

3090

Backpack Vacuum

- Clean on your schedule – day or night – with best-in-class low noise level
- Achieve a deeper level of clean with HEPA–exceeding, best-in-class air-filtration
- Minimize stress on shoulders and back via ergonomically-designed, light-weight construction

Quiet operation. Heavy filtration.

The new 3090 backpack vacuum offers maximum versatility to increase cleaning productivity: use the quiet, 56 dBa, low speed for daytime cleaning in noise sensitive areas; and the high-performance, 59 dBa, second speed for night cleaning.

And while the 3090 is lightweight, the performance is heavy-duty. An exclusive triple-filtration system traps 99.9% of all dust to 0.3 microns, easily beating HEPA requirements and making it ideal for environments with strict air-quality standards like:

- Hospitals
- Schools
- Restaurants
- Office buildings

Best of all, with a durable, polypropylene housing wrapped around the unique lightweight design, the new 3090 backpack vacuum withstands abuse while limiting stress on the user's shoulders and back.

3090 BACKPACK VACUUM

FEATURES

SPECIFICATIONS

Filtration	99.99978% @ 0.3 Microns
Sound level (2 speeds)	56/59 dBa
Sealed waterlift/airflow (max)	96 in. / 106 cgm
Bag capacity	6.3 qt / 6 L
Telescopic wand diameter	1.25 in. / 32 mm
Power cord length	49 ft / 15 m

Vacuum Motor

Power	1100 W
Type	120 V / 60 Hz

Warranty

A one-year warranty is extended to the original owner against manufacturing defects and workmanship on non-wear components for these machines.
