

COMMANDER™

COMMANDER™

Commander (PVC II)

Se recomienda para el corte en acero para estructuras, en acero para herramientas, en pesadas secciones de aluminio, etc

Dentado de distribución variable Optimizer (POV)

For tool steels, structural steels
and non ferrous materials.

Hakansson Sawblades

COMMANDER™

Unique positive tooth geometry for faster cutting and smoother surfaces.

This blade has been specially designed with a deeper tooth gullet to give optimal chip flow.

Developed to give you better tooth penetration and increasing your cutting rate, you will notice fewer blade changes and less down time.

The COMMANDER is available in two versions besides the normal standard setting also in extra heavy set.

*For tool steels, structural steels
and non ferrous materials.*

Commander (PCV7) variable tooth
