

LED EMERGENCY

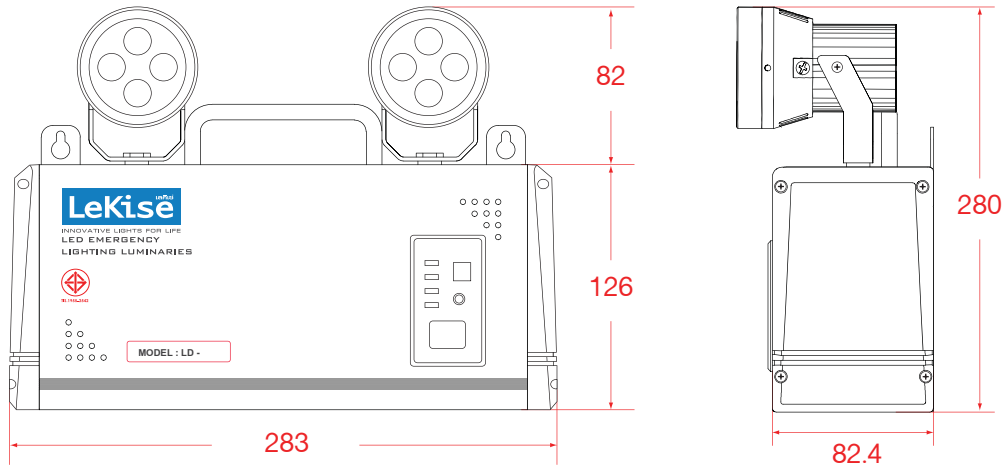

LED Emergency Light Technology. Combining innovative LED Technology, MICROCONTROLLER with intelligent battery charger. LED Emergency light emerges the highest level of illumination and features as below:

- LED Lamp is 4 times less energy consumption and 25 times lasting when comparing with halogen lamp.
- The compact battery produces 4 hour operation on power failure and 3 times saving for their battery replacement cost.
- Remote control provided.
- AUTO-TEST System.

FEATURE

- Steel sheet 1.7 mm. thickness with powder coating.
- Each head produces the lumen output equivalent to 50W halogen lamp.
- 7.5-7.8 AH 12V Sealed lead-acid battery.
- Constant lumen output control system providing a constant lumen output throughout the operation.
- Battery malfunction warning system.
- The LED's have a life of 50,000 hours.
- AUTO-TEST System operation:
 - 10 secs./week
 - 1 hr./month
- Battery testing can be done by infrared Remote Control.
- Certified by TIS 1955-2542
- 5 years warranty for main system and 2 years for battery.

DIMENSION

Unit : mm.

SPECIFICATION

PRODUCT CODE :	LK-EML-2X9W-001
Input Voltage	AC 220 V. / 50Hz.
Lamp Power	9 W. x 2
Color Temperature	2,700 - 3,500 K
Lamp Current	700 mA.
Sealed Lead Acid Battery	12 V. 7.5 AH
Max. Charger Current	750 mA.
Batt. Boost / Float Voltage	14.5 V. / 13.5 V.
Batt. Cutoff Voltage	10.5 V.
Max. Backup Time	4 hrs.
Dimension	208 x 283 x 82.4 mm.
Weight	4 kg.
