

COIL COVER

Advantages of Coil Cover

- The cover is the carbonate material which has excellent heat resistance and acid resistance, so it has great protection function for the existing valve and new production installation.
- The costs can be reduced because there is no needed to produce separate rain cover.
- It has excellent acid resistance & bursting strength.
- The dry state can be maintained by the property of matter of P.C. and the appearance is simple.
- It has easy connection, so it is easy to be used.

Utility model & Patent

NO.0172482

	FEATURES
Material	POLY CARBONATE
Operating Temperature	-100℃ ~ 220℃
Property	Heat, Acid, Corrosion resistance
Color	Transparent
Weight	40g

■ Example of Installation
