Actuator M3

To prevent manipulation of the actuator, The unclosed safety screw must be used (M4x8)

## Radial actuation / dimensions

[^0]The min. radius refers to a pivot at the top of the cap $\left(S_{0}\right)$

[^2]:    Notes
    Radial actuation may reduce the mechanical life.
    Unused actuator entry slot must be covered by the plug.
    The switch may not be used as a mechanical stop.

    The degree of protection (IP code) specified applies solely to a property closed cover and the use of an equivalent cable gland with adequate cable.
