

# P5036-16-R

The AVer P5036-16-R 36 channel hybrid NVR includes an embedded Linux based operating system and an Intel based CPU. The result is a more reliable and more powerful NVR, ideal for large retail environments. The P5036-16-R supports 36 channels including up to 16 analog channels and uses hardware RAID, ensuring that all of your high quality data will be stored very securely.

## 36CHs preview and playback simultaneously

The dual monitor support function allows users to simultaneously view up to 36 live channels and playback. This great feature ensures users can playback their

recorded data and still view the live feed to make sure nothing is missed.

## Storage space maximization

The P Series is equipped with an independent processor and memory for Hardware RAID giving additional security to your data in case of corruption. Combine with our optimized recording technology to further improve your security storage system.

HDD Tray  
x10

## 40TB internal storage space

Equipped with ten 4-Terabyte HDDs (8 hot-swappable) provides users with a massive storage device. Featuring swappable HDDs, it is easy to remove or replace disks, whilst keeping your data very secure.

## Easy POS integration

By supporting POS integration and advanced iPOS functions, users have a system which makes it very easy to keep track of transactions and ensure that no shrinkage takes place.

Linux OS

## Reliable and secure operating system

Using a Linux based operating system, users get a powerful system for an excellent price, with great reliability as well as being very secure.
