Electronic pressure-independent valve EPIV. The clever way to control the flow rate.

EXPERIENCE
EFFICIENCY

The EPIV unites four functions in one ready-to-install unit: measuring, controlling, balancing and shutting. This is how you increase efficiency during planning, implementation and operation:

- Time-saving and safe valve selection in accordance with maximum volumetric flow
- Rapid, simple installation and commissioning
- Automatic, permanent hydraulic balancing through the valve
- Securing of the correct amount of water with differential pressure changes and with partial loads
- Real time information of the measured flow rate

BELIMO®

Electronic pressure-independent valve EPIV.
With electronic flow rate setting.

Electronic flow rate control

Integrated flow measurement
Air bubble tight-closing characterised control valve

- **Energy-efficient:**
  No leakages thanks to air bubble tight-closing characterised control valve (leakage rate A in accordance with EN12266-1)

- **Flexible:**
  Easy-to-adjust maximum flow rate

- **Installation-friendly:**
  All components combined in a single unit

- **Time-saving:**
  Markedly reduced effort for hydraulic balancing

- **Versatile:**
  Conventional or Belimo MP-Bus® communication

- **Secure:**
  Desired flow rate under all conditions

Four functions in one valve unit – now in nominal diameters from DN 15 to DN 150
